

No. 1

Signals and Systems: Introduction

Prof. Hui Jiang

Department of Electrical Engineering and Computer Science
Lassonde School of Engineering, York University

15-01-04

1

Course Outline (EECS2602)

- Introduction:
 - Signals and Systems in Continuous time (CT)
 - Properties and Operations
- Linear Systems Analysis
 - **Time domain analysis**
 - **Fourier analysis (Frequency analysis)**
 - **Laplace analysis**
- Engineering Applications:
 - RCL electrical circuits (electronics)
 - Filter design (signal processing)
 - Modulation (communication)
 - Linear Feedback (control)
- Advanced Engineering Mathematics
 - Complex numbers and functions
 - Ordinary differential equations

15-01-04

2

Tentative Schedule (EECS2602)

- Unit 1 – Introduction
 - Signals and Systems in Continuous time (CT)
 - Properties and Operations
 - **Quiz 1**
- Unit 2 – Time Domain Linear Systems Analysis
 - Ordinary differential equations
 - Impulse response of a linear
 - Convolutional integral
 - **Quiz 2**
- Unit 3 – Fourier Analysis of Linear Systems
 - Fourier series and Fourier transform
 - Frequency response of linear systems
 - **Quiz 3**
- Unit 4 – Laplace analysis of Linear Systems
 - Laplace transform
 - Transfer function of linear systems
 - **Quiz 4**
- Unit 5 – Engineering Applications
 - Filter design (signal processing)
 - Linear Feedback (control systems)
 - **Final Exam**

15-01-04

3

Course Evaluation (EECS2602)

- Assignments and in-class quizzes (40% in total)
 - 4-5 assignments (optional, 0%)
 - 3-4 in-class quizzes (1 hr each, 40% in total)
- 4-5 Labs (20% in total): M (10:00-13:00) @WSC
 - Lab1: matlab introduction
 - Lab2: audio signals
 - Lab3: music synthesis
 - Lab4: amplitude modulation
 - Lab5: sound synthesis (?)
- Final exam (40% in total)

15-01-04

4

Signals

- What are signals?

15-01-04
5

Signals

Day	Temperature
S	21.0
M	22.0
T	20.9
W	21.6
H	23.0
F	22.3
S	20.2

15-01-04
6

Signal Types (I)

- Analogue Signals

- Continuous Time (CT) Signals

- Discrete Signals

- Discrete Time (DT) Signals

15-01-04

7

Signal Types (II)

- Periodic vs. Aperiodic Signals

- Fundamental frequency

- Harmonics

- Examples: sinusoidal signal, complex exponential

- Superposition

15-01-04

8

Signal Types (III)

- Even vs. Odd signals

- Any signal can be decomposed to an odd and an even signal
- Superposition

15-01-04

9

Energy and Power

- Definition
 - Energy/Power signals
- Energy signals
- Power signals

15-01-04

10

Real vs. Complex Signals

- Real signals
- Complex signals
- Complex numbers (reviews)

15-01-04

11

Elementary Signals (I)

- Unit step signal
- Rectangular pulse signal
- Signum signal
- Ramp signal
- **Unit impulse signal**

15-01-04

12

Elementary Signals (I)

15-01-04

13

Elementary Signals (II)

- **Sinusoid signals (CT)**
- Sinc signals (CT)
- **Exponential signals (CT)**
 - Real-valued
 - Complex-valued

15-01-04

14

Elementary Signals (II)

15-01-04

15

Elementary Signals (II)

15-01-04

16

Signal Operations

- Scaling
- Time shift
- Time scaling
- Time reversal
- Combined operation:
- Linear Combination of signals

15-01-04

17

Beat Frequency

- Superposition of two sinusoidal signals

18

Beat Frequency

- CT signals are:

$$x_1(t) = \sin\left(\frac{2\pi}{3}t\right)$$

$$x_2(t) = \sin(0.5\pi t)$$

- Signal superposition
- What is the period of this signal?
- Use trig identities to show

$$x_1(t) + x_2(t) = 2 \cos\left(\frac{\pi}{12}t\right) \sin\left(\frac{7\pi}{12}t\right)$$

CSE 3451

15-01-04

19

Signal Review (I)

Determine the values of T which make the following signal (a) an even signal and (b) an odd signal

$$x(t) = 3 \sin\left(\frac{2\pi(t-T)}{5}\right)$$

15-01-04

20

Signal Review (II)

Express the following signal as a combination of a unit step and ramp functions

15-01-04

21

Systems

15-01-04

22

CT System Example (I): RCL circuits

15-01-04

23

CT System Example (II): Amplitude Modulator (AM)

15-01-04

24

System Types

- Linear vs. non-linear systems
- Time-varying vs. time-invariant systems
- Memory vs. memoryless memory
- Causal vs. non-causal systems
- Invertible vs. non-invertible systems
- Stable vs. unstable systems

15-01-04

25

System Interconnection

- Cascaded configuration
- Parallel configuration
- Feedback configuration

15-01-04

26
